

STATEMENT long

Christina Schultz is a multidisciplinary artist and performer and linguistic nomad. She develops collaborative projects and works with cinematographic, scenic and graphic elements. Whatever format though, her main interest is the human being and its constraints, concerns and conversations. Some of the best opportunities of her career result from error and clumsiness.

She successfully terminated the Independent Study Program of the MACBA (Contemporary Art Museum of Barcelona) and is a permanent resident of Piramidón, art center in Barcelona where she lives since 20 years.

Recently she has developed her artistic practice in international artistic contexts, in residences and private spaces, with several independent projects and scholarships, with alternative and institutionalized distributions, in performative actions and polyvalent exhibitions.

She has expanded his collaborations with talented people and organizations such as the PEI and his MACBA faculty, Piramidón and Hangar.org, art centers, Pau Cata, artistic research graduate, La Capella, EINA, Blueproject Foundation, the Institut 4Cantons and all the people who actively participated in her projects.

This has been possible thanks to the support of Tere Badía, Clara Garí, Nau Coclea, Oscar Abril Ascaso, Mar Merino, Daniel Canet, Fundació Tàpies, Paola Marugán, Espacio Práctico, Claus Strigel and Matthias Zentner amongst many others.

STATEMENT short

Christina Schultz is an audiovisual artist, performer and linguistic nomad self-taught in continuous training. Many of her projects are developed through intense collaborations and include the research process as part of the desired result. She works with cinematographic, musical and graphic elements, but whatever format, her main interest lies in the human being, its constraints, concerns and conversations. Some of the best opportunities of her career result from error and clumsiness.
